

FEATURES & BENEFITS:

- O Bridge voice between two radios
- O Monitor up to two different radios
- O Select individual radios for use
- O Robust design
- O Voice Activity Detection (VAD)
- O Automatic Gain Control (AGC)
- O Built-in Speaker

RADIO VOICE BRIDGE

The RapidM RV2 is a purpose-built unit which interfaces to 2 different radios simultaneously. It provides the operator with a Handset/Headset interface from where the received audio from both radios can be monitored.

The operator can select the individual radio to which he wants to talk while still being able to see activity on the other radios via an LED indication.

The operator can also select to cross-connect the audio from Radio 1 to Radio 2 and visa-versa to form a bridge between separate radio networks. In this scenario, the operator can still monitor and speak onto both radio networks.

Voice activity is continually being detected on all the radios and radio levels are automatically adjusted and normalised via the automatic gain control. The user can adjust the handset and built-in speaker volume as desired.

AUTHORIZED USA

SELECTOR SWITCH

The following modes are available on the RV2 selector switch:

OFF Unit is powered down

L1 Adjust audio output level to Radio 1

L2 Adjust audio output level to Radio 2

R1-R2 Radio 1 & Radio 2 Bridged. Receive and Transmit to Radio 1 & 2

R1 Receive and Transmit to Radio 1. (No bridging). Monitor Radio 2.

R2 Receive and Transmit to Radio 2. (No bridging). Monitor Radio 1.

LED INDICATION

Light Emitting Diodes on the *RV2* unit indicates to the operator receive and transmit audio activity on any of the connected radios.

VOLUME CONTROL

The *RV2* provides Volume control that adjusts both the Handset/ Headset as well as the internal speaker volume. When in the L1 or L2 selector setting, the Volume control adjusts the audio output level to to Radio 1 and Radio 2 respectively.

POWER

The *RV2* Unit is powered by any of the radios that it connects to. The Power LED will flash when power is connected to the device.

The *RV2* units are fitted with internal waterproof speakers to alert operators of incoming calls or radio activity. This provides a convenient way to monitor multiple radios from a distance.

RADIO VOICE BRIDGE PACKAGE

The RV2 package includes:

1x RV2 Unit

1x H-250 type handset

1x RV2 User Manual

RV2 ACCESSORIES

Radio Cable: Contact us for appropriate cables to support your radio models.

Accessories: Please contact us for additional accessory information such as shock-mount options.
